SUMMARY

Solution-driven web developer adept at contributing to a highly collaborative work environment and finding solutions. Proven experience developing consumer-focused websites using Front-end and Back-end technologies. Good knowledge of the best practices for web design, user experience, and speed.

EXPERIENCE

Web Developer

Freelance

August 2022 - Present, Sfax, Tunisia

- Conceive, develop, and sustain web-based applications. This includes creating the application's user interface, coding the application's functionality, and testing the application to ensure that the application working properly.
- Collaborate with clients to comprehend their needs and requirements. This includes gathering requirements, discussing design options, and ensuring the application meets the client's expectations.
- Remain current on the most recent web development technologies. This includes learning new programming languages, frameworks, and libraries.
- Troubleshoot and debug application issues. This includes identifying and fixing errors in the application's code, as well as resolving any performance or usability issues.

Packaging Agent

Graphy Print

February 2020 - June 2022, Sfax, Tunisia

- Developed and implemented efficient and cost-effective packaging solutions and strategies for shipped goods across the entire production lifecycle, from design to delivery.
- Determine the best packaging materials for each product. This includes considering the product's size, weight, fragility, and intended shipping destination.
- Design and create packaging layouts. This involves creating a visual representation of how the product will be packaged, including the materials used, the dimensions of the package, and the placement of the product within the package.
- Prepare products for shipment. This includes assembling the packaging, labeling the package with the necessary shipping information, and ensuring that the product is properly packed to prevent damage during shipping.
- Inspect packaged products for quality. This involves checking the package for any damage, ensuring that the product is properly packed, and verifying that the shipping information is correct.

IT Technician

KIB

August 2017 - September 2019, Sfax, Tunisia

- Installed software applications and hardware components, troubleshoot and resolved technical issues within set deadlines, and monitored system performance on 50 computers.
 - Successfully completed a total of 90 updates and maintenance tasks to ensure that all computers are updated operating systems and current antivirus protection; monitored network health and addressed any vulnerabilities with patching.
 - Perform all repairs with utmost concern for customer privacy.
-
